Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1864 edition. Excerpt: . . . system, till all its oxygen or vitality is expended, when the veins, beginning where the arteries terminate, collecting all the refuse blood. take it back to the heart, to be sent again into the lungs, to be once more converted, by the breathing of the child, into arterial blood, and again and again to be distributed over the body. The Skits. --Many persons suppose that the cuticle that envelopes the bod; is a mere covering to the flesh, an envelope, in fact, merely to keep the parts compact and. in their place; this is a great mistake, and one that it behoves a mother most particularly to avoid. The skin is designed by nature to act not only as a covering to the body, but to perform the duty of a multiplicity of drains or common sewers, and carry off from the body, in...
