John Hunt Publishing. Paperback. Book Condition: new. BRAND NEW, Beyond God: A Scientist's Search for the Meaning of Life in the 21st Century, Emmanuel P. Papadakis, Beyond God is the product of a scientist's decade-long journey through Eastern and Western philosophy and religion inspired by the dramatic changes in modern science. Beginning from the perspective of secular Western atheism and believing the world is largely as we see it, the author considers the nature of reality more deeply: what science really tells us, what that means for religion and philosophy, and what that implies for how we choose to live. The result is an exploration of the key ideas in religion and philosophy that are compatible with recent scientific developments, which form the basis for a synthesis of Eastern and Western thought on the path to happiness. Beyond God considers the purpose of existence, what science really means for our view of the 'meaning of life', and how we should live it.
