Figures 4, 5, and 6 are plots of the seismic shape statistics skew and kurtosis from sample files used in training for the three classes. One can readily see that the seismic shape statistics for skew and kurtosis are almost linearly separable; thus, a multilayer perceptron like the BPNN classifier performance will improve with their addition 14, 15 . These results suggest that one may find it beneficial to develop a hierarchical classifier using these shape statistics in the first stage of classification. A simple linear discriminant classifier should prove to very powerful in this case 14 . Table 3...
