Springer Science+Business Media, LLC

Book Condition: New. Publisher/Verlag: Springer, Berlin | Since the late 1960s, there has been a revolution in robots and industrial automation, from the design of robots with no computing or sensory capabilities (first-generation), to the design of robots with limited computational power and feedback capabilities (second-generation), and the design of intelligent robots (third-generation), which possess diverse sensing and decision making capabilities. The development of the theory of intelligent machines has been developed in parallel to the advances in robot design. This...
