Common Feeds and Fodder Crops of Farm Animals in India

By Bunglavan, Surej Joseph / Joseph, Suman

Book Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The feeds and fodders for livestock are classified as roughages and concentrates, dry and fresh, as well as conventional and unconventional. Crop residues are the single largest bulk feed material available at the doorsteps of the farmers for feeding livestock, specifically, the ruminants. Antinutritional factors present in the agro-byproducts or unconventional feeds can interfere with the feed utilization, reduce production or affects the health of the animal. Various agro-byproducts, unconventional products such as molasses, silkworm pupae, distillery waste, wastes and byproducts from meat, milk and fish, chiefly meat scrap, whey powder and fish meal are put into use for livestock feeding in India for economic livestock farming. | Format: Paperback | Language/Sprache: english | 68 pp.

Reviews

Thorough manual for ebook fans. it had been writtern quite properly and valuable. It is extremely difficult to leave it before concluding, once you begin to read the book.
